DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,13 and 25-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Hall '353.

Hall discloses the claimed invention, including a rotor hub through which exhaust gases are routed during forward motion. An exhaust bypass is provided which causes the exhaust gases to be routed downstream of the rotor during reverse operation. The bypass is "set by" rotation direction (such fails to define over the linkage arrangement of Hall). A stator housing is mounted to the aft end of the rotor housing as claimed. A clamp 6 is provided for attachment of the rotor housing to the skeg.

Re claims 25-32, the method is inherent, and claims 26-32 recite only structure, therefore are accorded no weight in the claims.

3. Claims 3-9,11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 14-21 are allowed.

5. Applicant's Petition to Make Special is noted, it will be acted on in due course.
